Report Overview

The cosmetic sponge, also known as a beauty blender or makeup sponge, is a versatile tool used for applying and blending liquid, cream, or powder makeup products such as foundation, concealer, blush, and highlighter. Typically made from porous, latex-free materials like polyurethane foam, these sponges are designed to absorb minimal product while providing a smooth, airbrushed finish. They come in various shapes?teardrop, egg, flat, or wedge?to cater to different application techniques and areas of the face. Some variants are infused with water-activated properties, expanding when dampened to enhance blending and reduce product wastage. Its popularity has grown alongside trends in natural-looking makeup and skincare-infused cosmetics.
