Abstracts

Lotion spray is a type of spray, a lotion specially designed for "lazy people". Toner spray, simply put, is to spray the lotion with extremely fine water particles through the high-pressure system, so that the tiny droplets of the lotion float in the air, thus forming a white mist, similar to the effect of natural fog. Make-up water is generally a transparent liquid, which can remove dirt and oily secretions on the skin, keep the skin stratum corneum with moderate moisture, and have the functions of softening the skin and preventing rough skin. The total size of the global beauty industry in 2022 was about US\$ 427 billion, with the sales of skin care products was about US\$ 190 billion, perfumes US\$ 70 billion, color cosmetics US\$ 80 billion, hair care products US\$ 90 billion. Head beauty and personal care companies are concentrated in Europe and the United States.
