## Abstracts

### Report Overview:

Cricket Turf Shoes are an essential piece of equipment for any player and not a decision to be made lightly. There are different types of shoe available for different playing positions, as well as shoes made specifically for junior players, so it's important to weigh everything up before making a buying decision.

Batting shoes – these are typically lightweight and low profile allowing the player to be quick on his feet in between the wickets.

Bowling shoes (boots) – these look like shoes but are typically referred to as boots due to the slightly higher ankle of some models to give additional support to the bowler during a fast bowling action

Fielding shoes – Generally known as “all-rounders”, these shoes are made with fielders’ in mind, but can also be used by other players as they tend to be lighter than shoes made for a specific purpose.

The Global Cricket Turf Shoes Market Size was estimated at USD 785.64 million in 2023 and is projected to reach USD 1199.01 million by 2029, exhibiting a CAGR of 7.30% during the forecast period.
