Report Overview

Crossed roller linear way, also known as crossed roller guide, is a limited-stroke linear guide. It consists of two guide rails with V-shaped raceways, a roller cage and cylindrical rollers. These cylindrical rollers reciprocate on precision-ground V-shaped raceway surfaces and are arranged crosswise with each other. This special arrangement allows the crossed roller linear guide to withstand loads in all directions and achieve high-precision, smooth linear motion. It is particularly suitable for linear guides where high rigidity and flexible movement are required.
