Report Overview

Crossover vehicle is a type of sports utility vehicle (SUV) with unibody construction.[1] Crossovers are often based on a platform shared with a passenger car; as a result they typically have better interior comfort, a more compliant ride, and superior fuel economy, but less off-road capability than truck-based SUVs.[2][3][4] The latter is compounded by many crossovers being sold without all-wheel drive, which challenges their definition as 'sports utility vehicles'.

The global Crossover Vehicles market size was estimated at USD 33 million in 2023 and is projected to reach USD 46.16 million by 2032, exhibiting a CAGR of 3.80% during the forecast period.
