## Abstracts

Custom aptamer services involve the design, development, and synthesis of aptamers, which are short single-stranded DNA or RNA molecules that can bind to specific target molecules with high affinity and specificity. These services provide expertise and resources to create custom aptamers for various applications, including research, diagnostics, therapeutics, and biotechnology. The custom aptamer service market has witnessed growth in recent years due to several factors. One of the key drivers is the increasing demand for highly specific and selective molecular recognition tools. Aptamers offer advantages over traditional antibodies and other affinity reagents due to their small size, high affinity, stability, and cost-effective synthesis. Custom aptamer services enable researchers and companies to obtain aptamers that can bind to specific targets of interest, facilitating various applications in diverse fields. Furthermore, the market is driven by advancements in aptamer selection and optimization techniques. Custom aptamer services utilize various approaches, such as systematic evolution of ligands by exponential enrichment (SELEX) and modified SELEX protocols, to generate aptamers with desired binding properties. These services provide expertise in aptamer selection, optimization, and characterization, allowing clients to obtain aptamers that meet their specific requirements.

The global Custom Aptamer Service market size was estimated at USD 263.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.70% during the forecast period.
