Abstracts

Increasing demand for mechanized cutting equipment in fabrication is expected to be one of the major trends fueling growth of the global cutting equipment market in the near future. In developed countries, due to the shortage of skilled labor, the demand for cutting automation technology for fabrication and manufacturing purposes is on a rise. Major companies in several developed countries in North America and Europe have started using cutting robots for their manufacturing processes in order to reduce dependency on manpower. Increasing labor costs in turn increase overall manufacturing cost of products, especially in developed countries. This trend is also gaining popularity in some developing countries. Rapid growth of end-use industries such as construction, automotive, shipbuilding & offshore, and manufacturing is expected to drive global growth of the cutting equipment market, especially in the APAC region over the assessment period.

The global Cutting Equipment market size was estimated at USD 3242.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.10% during the forecast period.
