Report Overview

Cyber-insurance is an insurance product used to protect businesses and individual users from Internet-based risks, and more generally from risks relating to information technology infrastructure and activities. Risks of this nature are typically excluded from traditional commercial general liability policies or at least are not specifically defined in traditional insurance products. Coverage provided by cyber-insurance policies may include first-party coverage against losses such as data destruction, extortion, theft, hacking, and denial of service attacks; liability coverage indemnifying companies for losses to others caused, for example, by errors and omissions, failure to safeguard data, or defamation; and other benefits including regular security-audit, post-incident public relations and investigative expenses, and criminal reward funds.

The global Cyber Insurance market size was estimated at USD 9324 million in 2023 and is projected to reach USD 128146.66 million by 2032, exhibiting a CAGR of 33.80% during the forecast period.

North America Cyber Insurance market size was estimated at USD 4041.25 million in 2023, at a CAGR of 28.97% during the forecast period of 2024 through 2032.

This report provides a deep insight into the global Cyber Insurance market covering all its essential aspects.
