Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Cyclotetramethylene Oxide competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Cyclotetramethylene Oxide production reached approximately 1,863 K Tons, with an average global market price of around 1,677 USD per Ton.

Cyclotetramethylene Oxide, also known as tetrahydrofuran (THF), is a cyclic ether with the chemical formula C_4H_8O . It is a colorless, water-miscible, and highly volatile liquid with a mild, ether-like odor. Cyclotetramethylene Oxide is widely used as an organic solvent due to its excellent ability to dissolve both polar and non-polar compounds. It is also an important intermediate in chemical synthesis, particularly in the production of polytetramethylene ether glycol (PTMEG) – a precursor for spandex fibers, thermoplastic polyurethanes (TPU), and copolyester-ether elastomers. Cyclotetramethylene Oxide primary upstream raw material is 1,4-butanediol (BDO). Typical suppliers include BASF, Dairen Chemical, LyondellBasell, Ashland, Nanya Plastics Corporation, and Mitsubishi Chemical. Downstream customers primarily include PTMEG, coatings and inks, and pharmaceutical manufacturers, with typical customers including BASF, The Lycra Company, Mitsubishi Chemical, Korea PTG, and Huafo Chemical. Single-line production capacity varies significantly depending on the production process and investment scale of the production equipment, typically ranging from several thousand to tens of thousands of tons. Product gross profit margins are significantly influenced by factors such as the price of the raw material BDO, market supply and demand, and the production process, typically ranging from 20% to 30%.

The global Cyclotetramethylene Oxide market size was estimated at USD 3126.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.90%

during the forecast period.
