Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Cyclopentane Blowing Agent competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Cyclopentane Blowing Agent production reached approximately 175.8 k tons, with an average global market price of around US\$1,635 per ton. Cyclopentane (also called C pentane) is a highly flammable alicyclic hydrocarbon with chemical formula C_5H_{10} and CAS number 287-92-3, consisting of a ring of five carbon atoms each bonded with two hydrogen atoms above and below the plane. It occurs as a colorless liquid with a petrol-like odor. Its freezing point is $-94\text{ }^{\circ}C$ and its boiling point is $49\text{ }^{\circ}C$. Cyclopentane is in the class of cycloalkanes, being alkanes that have one or more carbon rings. It is formed by cracking cyclohexane in the presence of alumina at a high temperature and pressure. Cyclopentane Blowing Agent is a blowing agent for the polyurethane foams that are used to insulate refrigerators and freezers. Unlike some other chemicals used to insulate refrigerators, cyclopentane does not contain hydrofluorocarbons (HFCs). The use of cyclopentane as a blowing agent is low, and the foaming process has low requirements on the preheating and ring temperature of the mold. Cyclopentane, as an eco-friendly blowing agent, has increasingly gained attention in the global market. Its low toxicity, good thermal stability, and ozone-friendly properties provide clear advantages over traditional chlorofluorocarbon-based blowing agents. Applications of Cyclopentane are expanding in areas such as refrigeration equipment, building insulation materials, and insulated containers, gradually becoming the mainstream choice. With the rising global demand for environmentally sustainable materials and the tightening of related regulations, the scope of Cyclopentane applications continues to grow, supporting a positive outlook for its market development.

The global Cyclopentane Blowing Agent market size was estimated at USD 287.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.30% during the forecast period.
