Report Overview

Dancing machine is the pioneering series of the rhythm and dance genre in video games. Players stand on a 'dance platform' or stage and hit colored arrows laid out in a cross with their feet to musical and visual cues. Players are judged by how well they time their dance to the patterns presented to them and are allowed to choose more music to play to if they receive a passing score.

Testing and coding are done incrementally and interactively, building up each feature until it provides enough value to release to production.
