## Abstracts

Dark stem soft seal gate valve is a valve used to control fluid flow, combining dark stem design and soft seal technology. Its main feature is that the valve stem is hidden inside the valve body (i.e. dark stem design), avoiding external corrosion and contamination, thereby improving the durability and aesthetics of the valve. Soft seal technology uses sealing materials with good elasticity (such as rubber or PTFE) to provide a tighter sealing effect to prevent leakage, especially suitable for pipeline systems with low pressure or complex fluids.

The global Dark Stem Soft Seal Gate Valve market size was estimated at USD 286.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.30% during the forecast period.
