Abstracts

Data Center as a Service (DCaaS) is a cloud service model where providers deliver a comprehensive suite of data center resources, including physical infrastructure such as servers, storage, and networking equipment, as well as virtualized environments, management tools, and security features, on a subscription or pay-per-use basis, enabling organizations to outsource their entire data center operations without the capital expenditure and maintenance burdens associated with building and managing on-premises facilities. The global DCaaS market is experiencing robust growth, driven by increasing demand for scalable, flexible, and cost-effective IT infrastructure solutions, particularly among small and medium-sized enterprises (SMEs) and organizations undergoing digital transformation. Key factors fueling this expansion include the rising adoption of hybrid and multi-cloud strategies, the proliferation of data-intensive applications such as artificial intelligence, big data analytics, and Internet of Things (IoT), and the growing emphasis on business continuity and disaster recovery. Major players in the market include established cloud providers like Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform, as well as specialized infrastructure-as-a-service (IaaS) providers and traditional data center operators expanding their service portfolios. Despite its advantages, the market faces challenges such as concerns over data security and compliance, especially in highly regulated industries, and the complexity of integrating DCaaS with existing on-premises systems. However, ongoing advancements in edge computing, automation, and sustainable data center practices are expected to create new opportunities, positioning DCaaS as a critical enabler of agile and resilient business operations in the coming years.

The global Data Center As A Service market size was estimated at USD 120000.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 18.50% during the forecast period.
