Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Data Center Intelligent Inference Server competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Data center intelligent inference servers are high-performance servers specifically designed for AI model inference calculations. Typically equipped with a GPU, NPU, or dedicated AI accelerator chip, they offer high throughput, low latency, and optimized energy efficiency. They are primarily used in applications such as speech recognition, image processing, natural language processing, and recommendation systems. Data center intelligent inference servers are expected to sell approximately 1.7 million units in 2024, with an average unit price of approximately \$45,000. Intelligent inference servers are benefiting from the surge in artificial intelligence and informatization, the rapid development of AIGC (AIGC) represented by Chat GPT, DeepSeek, and Grok, domestic policy incentives, and the large-scale commercialization of liquid-cooled servers. The market is expected to maintain medium-to-high growth in the next few years. From an enterprise perspective, AI inference applications are more commercially viable than AI training, and the scale of inference servers is expected to grow faster than that of training servers in the next few years. Liquid-cooled servers, due to their adaptability to higher computing power scenarios and significant cost reduction potential, are also expected to have a broad market prospect for liquid-cooled servers used in data centers, driven by policy incentives such as the "White Paper on Liquid Cooling Technology for Telecom Operators."

The global Data Center Intelligent Inference Server market size was estimated at USD 76500.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.90% during the forecast period.
