A Data Gathering Panel (DGP) refers to a curated group of individuals or entities who have agreed to participate in ongoing data collection efforts, often used in market research, social science studies, or public opinion polling. These panels are typically assembled and managed by specialized firms to ensure a representative or targeted sample, and participants are recruited through various methods, including online invitations, referrals, or partnerships, with incentives offered for their continued engagement. Data is collected through surveys, behavioral tracking, product testing, or other interactive means, enabling researchers and businesses to gather longitudinal insights, track trends, and validate hypotheses with a reliable and readily accessible respondent base.
