Abstracts

Dedicated cloud service refers to a cloud computing model where an organization leases a private, physically isolated infrastructure environment hosted and managed by a cloud provider. Unlike multi-tenant public cloud services, dedicated cloud resources?such as servers, storage, and networking?are exclusively allocated to a single client, ensuring enhanced security, performance predictability, and regulatory compliance. These services are typically offered as part of Infrastructure-as-a-Service (IaaS) or managed private cloud solutions, combining the scalability and flexibility of cloud technology with the control and isolation traditionally associated with on-premises data centers.

The global Dedicated Cloud Service market size was estimated at USD 12050.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 15.20% during the forecast period.
