Report Overview:

Dengue vaccine is a vaccine used to prevent dengue fever in humans. As of 2019, one version is commercially available, known as CYD-TDV, and sold under the brand name Dengvaxia. The vaccine is only recommended in those who have previously had dengue fever or populations in which most people have been previously infected. The value of the vaccine is limited by the fact that it may worsen outcomes in those who have not previously been infected. It is given as three injections over a year.
