Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Dental Bite Guard competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global production of dental bite guards reached approximately 12.47 million units, with an average global market price of around US\$100 per unit. Gross margin is ~50%. Illustrative cost structure: materials ~10%, manufacturing & finishing ~30%, QA/packaging/logistics ~6%, depreciation & overhead ~4%. A dental bite guard is a customizable oral device primarily used to relieve bruxism, temporomandibular joint disorder (TMJ), and other related dental conditions.
