Report Overview

Dental PACS (Picture Archiving and Communication System) is a specialized software system designed for the storage, retrieval, management, distribution, and presentation of digital images obtained through dental imaging devices such as X-ray machines, intraoral cameras, and 3D scanners. Dental PACS allows dental professionals to efficiently store and access patient images, enabling better diagnosis, treatment planning, and collaboration among dental teams. By digitizing and centralizing patient images, Dental PACS enhances workflow efficiency, reduces the need for physical storage space, and improves overall patient care by providing quick access to historical images for comparison and analysis.
