Report Overview

Deodorant wipes are single-use, pre-moistened towelettes infused with odor-neutralizing or antibacterial ingredients designed to provide quick and convenient personal hygiene, particularly in situations where traditional deodorant application is impractical. These wipes are typically alcohol-based or contain natural antimicrobial agents like tea tree oil, along with mild fragrances to mask body odor, making them popular among travelers, athletes, and professionals seeking on-the-go freshness. Unlike traditional stick or spray deodorants, they offer portability, disposability, and the added benefit of light cleansing, positioning them as a hybrid between deodorants and cleansing wipes. The market for deodorant wipes has grown alongside increasing demand for travel-friendly and time-efficient personal care products, particularly in regions with active lifestyles or humid climates where sweat and odor management are prioritized.
