Report Overview:

A bladeless fan, also called an air multiplier, can generate a natural and continuous cool air, and because there are no blades, it will not cover dust or hurt children's fingers. What's even more amazing is its peculiar shape, and its appearance is both streamlined and refreshing. Inspired by Air Vane Hand Dryers. The hand dryer works by forcing air through a small opening to "brush" the water on the hands, and the air multiplier blows air out of a 1.3mm wide cut that rotates around a ring. Because the air is forced out of this circle, the amount of air passing through can be increased by a factor of 15, and the speed can be increased to a maximum of 35 kilometers per hour.

The Global Desktop Bladeless Fan Market Size was estimated at USD 513.71 million in 2023 and is projected to reach USD 653.77 million by 2029, exhibiting a CAGR of 4.10% during the forecast period.
