Abstracts

The Desktop Humidor is a small, portable humidifier designed for storing cigars, tobacco, or other items that require controlled humidity. It usually has a compact size and is suitable to be placed on the desktop or any easily accessible place for users to use at any time. The main function of the Desktop Humidor is to provide a stable humidity environment to maintain the quality and taste of your cigar or tobacco. It usually has an adjustable humidity control system that allows users to set and maintain ideal humidity levels according to their needs. In addition, Desktop Humidor is often sealed to prevent interference from outside air and humidity. These humidors are typically made of wood, though other materials like acrylic or metal are also used. They often feature a hygrometer to measure humidity levels and a humidification device to maintain the desired moisture content, usually around 70-75%. Desktop humidors come in various sizes, from small ones that can hold just a few cigars to larger ones that can store dozens. They are popular among cigar enthusiasts who want to keep their cigars in prime condition for smoking. Global key players of Desktop Humidor include J. C. Newman Cigar, Gerber, Ashton Distributors, Daniel Marshall, Prestige Import Group, etc. The top five players hold a share about 3%. North America is the largest market, and has a share about 54%, followed by Europe and Asia Pacific with share 31% and 8%, separately. In terms of product type, Traditional Desktop Humidor is the largest segment, occupied for a share of 99%. In terms of application, Household has a share about 96 percent.
