Abstracts

Dewaxed bleached shellac is a refined natural resin derived from the secretions of the lac insect (*Kerria lacca*), which undergoes a specialized processing sequence involving solvent extraction to remove natural waxes followed by a bleaching treatment to achieve a pale, transparent, or light-colored appearance; this purification enhances its solubility, clarity, and compatibility, making it particularly valuable as a high-performance coating, film-forming agent, or binder in industries such as pharmaceuticals (for tablet and capsule coatings), food (as a glazing agent), confectionery, cosmetics, and fine wood finishing, where a colorless, inert, and glossy finish is required.
