## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Diamond Mono Wire Profiling Machine competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of single-wire profiling saw will reach approximately 4,300 units, with an average price of approximately US\$27,800 per machine and an industry average gross profit margin of between 28% and 32%. Single-wire profiling saws are specialized stone processing equipment that utilize a single diamond wire for cutting and contouring. They are capable of high-precision linear cutting and shaping of slabs such as marble, granite, and artificial stone. Due to their high efficiency, narrow kerf, and low material loss, they are widely used in architectural decoration, stone crafts, and tombstone manufacturing. The upstream market primarily relies on the supply of key components such as diamond wire, wear-resistant guide wheels, motors, and CNC systems, raw material cost structure accounts for approximately 58%-65% of the total machine manufacturing cost; the downstream market serves stone mines, stone processing plants, and decorative engineering companies. For example, the renowned European manufacturer THIBAUT has an annual production capacity of approximately 500-600 single-wire profiling saws, primarily serving the high-end stone processing market.

The global Diamond Mono Wire Profiling Machine market size was estimated at USD 119.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.60% during the forecast period.
