Report Overview

Dicaprylyl carbonate is a colorless and almost odorless component that conditions the skin and hair - leaving them smoother and softer. Even though it is essentially an oil, it does not make the surface greasy or oily. Additionally, it also increases the spreadability of the formulations. The chemical formula of Dicaprylyl carbonate is $C_{17}H_{34}O_3$. It is used in numerous cosmetic and skin care products like sunscreens, lotions, eye creams, etc.

The global Dicaprylyl Carbonate market size is projected to reach US\$ 97.50 Million by 2028, from US\$ 76.66 million in 2021, at a CAGR of 3.33% during 2022-2028.

Dicaprylyl carbonate is widely used in cosmetics. It can be added to high-end skin care cosmetics as an emollient, and can be added to sunscreen products to improve the sunscreen effect; it has good dispersibility for titanium dioxide, and is suitable for the formulation of makeup products such as foundation; it has a good effect on other oil phase components. It has good compatibility with makeup remover and can be used as the main component of makeup remover oil. The rapid development of the makeup and skin care industry is the core driving force behind the expansion of the dicaprylyl carbonate market.

With the continuous development of the global economy, people's demand for cosmetics continues to increase, which has promoted the rapid growth of the global cosmetics market. In addition, rising demand for natural cosmetics and personal care ingredients, growth in anti-aging demand, popularity of online sales, rising disposable income, rapid modernization and urbanization have led to an increase in per capita personal care spending, consumers in emerging countries have been increasing. Rising hygiene awareness is driving the dicaprylyl carbonate industry.

Segment by Type, the Dicaprylyl Carbonate can be split into Synthetic, Natural oil, etc. In 2021, the Natural oil type market dominates the Dicaprylyl Carbonate market, already accounting for 77.37% of the market share, higher than the Synthetic market's 22.63%. During the forecast period of 2022-2028, the size of the Natural oil type market will expand at a higher growth rate, reaching a CAGR of 5.67%.

In terms of application type, the Dicaprylyl Carbonate market can be segmented into Skin Care, Hair Care, and Others. From 2017 to 2021, the Skin Care market has been the most important market for Dicaprylyl Carbonate, and has already occupied an 85.87% market share in 2021. During the forecast period, the Skin Care market still maintains an absolute dominance, and its market size will grow at a CAGR of 5.03%. This is related to the important property that Dicaprylyl Carbonate conditions the skin and makes it very smooth without making it greasy, at the same time with a high safety factor.

On basis of geography, the Dicaprylyl Carbonate market is segmented into North America, Europe, Asia-Pacific, South America, Middle East and Africa, etc. Europe accounts for a large proportion of the global Dicaprylyl Carbonate market as there are prominent individuals in the region Nursing and cosmetic formulators.
