Abstracts

Digital Experience Orchestration (DXO) Platforms are software solutions designed to create, manage, and optimize customer experiences across various digital channels and touchpoints. These platforms integrate data, tools, and processes to deliver personalized experiences, streamline customer interactions, and enhance overall engagement. DXP platforms integrate content management, data analytics, and personalized marketing capabilities to provide businesses with one-stop digital experience solutions covering websites, customer centers, marketing campaigns, online communities, and other scenarios, helping companies improve customer experience and operational efficiency. Digital customer experience (DCX) remains a top priority for businesses, but limited cross-departmental collaboration and coordination are the biggest challenges facing DCX teams.
