Abstracts

The digital heart rate electronic sphygmomanometer is a portable medical device that integrates modern sensor technology and microprocessors. It is widely used to monitor blood pressure and heart rate at home and in medical institutions. It uses an inflated cuff to compress the artery in the upper arm or wrist, automatically measures blood pressure using the oscillation method, and detects heart rate simultaneously. It is easy to operate, intuitive to read, and has a large LCD screen for users to view data. Many models also have a memory function that can store multiple measurement results for long-term tracking of health conditions. It can support Bluetooth or Wi-Fi connection and can be synchronized with smartphone applications to provide more detailed health analysis and remote monitoring functions. Global Blood Pressure Monitor with ECG key players include OMRON Healthcare, Lepu Medical, Beurer, Philips and Withings, etc. Global top five manufacturers hold a share over 90%. The largest market is Europe, has a share over 30%, followed by APAC and United States, with around 20% and 22% market share respectively. In terms of product, Home Use is the largest segment, with a share over 80%. And in terms of application, the largest application is Online Sales, has a share about 76%, followed by Offline Sales. As age increases, the elderly are more likely to suffer from chronic diseases, such as cardiovascular disease and high blood pressure. High and low blood pressure can cause a series of diseases, such as heart failure, coronary artery disease, brain damage, kidney damage, etc. As awareness of the importance of monitoring health and wellness continues to rise, individuals are becoming more proactive in managing their health. This increased awareness contributes to the demand for at-home monitoring devices, including blood pressure and pulse testing devices.
