Report Overview:

In the past, the definition of a digital mortgage varied considerably across the industry. Today, most companies realize that it's not just about having an online application on Web, nor is it simply offering an e-closing. Although automating the borrower application and the closing process is part of the digital mortgage experience, we believe the definition needs to be expanded to include the automation of every step throughout the entire loan process.

We define a digital mortgage as a holistic experience for the borrower, starting with targeted marketing and lead generation to the initial application to processing to underwriting to closing and beyond with postclose audits and marketing.
