Abstracts

Dimethylmethoxy chromanol mainly works as an anti-oxidant in cosmetic products. Lipochroman-6 is a high potency anti-oxidant that's believed to inhibit tyrosinase activity and peroxynitrite formation- one of the main culprits behind lipide peroxidation and cell damage (2 huge skin agers). It's supposed to work by capturing free radical nitrogen and oxygen molecules in the body. Lipochroman-6 is a synthetic analog of gamma-tocopherol, but has been proven to have >20 times its anti-oxidant activity. It can therefore be used in very low concentrations. While this ingredient is a relatively new one, extensive data exists demonstrating it as a potent antioxidant. You can find it in skin care products such as facial moisturizer, sunscreen and anti-aging treatment.

The global Dimethylmethoxy Chromanol market size was estimated at USD 395.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.10% during the forecast period.
