Report Overview

DIN rail mounted safety relays are a special type of relay designed for the control and protection of safety circuits. They are widely used in industrial automation and machine control systems to monitor and respond to safety events to ensure the safety of operators and equipment. DIN rail is a standardized mounting system commonly used to install electrical equipment and components into electrical control cabinets or distribution boxes. The DIN rail installation safety relay has a shape and size compatible with DIN rail, and can be easily installed on the DIN rail, making it compactly arranged in the control cabinet and easy to install and maintain. The main function of safety relays is to monitor and control safety circuits.
