Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Display Driver IC Tester competitive dynamics, regional economic interdependencies, and supply chain reconfigurations.In 2024, the global production of Display Driver IC Tester will reach 1,200 units, with an average selling price of US$452.23 thousand per unit. Downstream customers include ProbeLeader, PHYTEK Corporation, and others, with driver chip design companies, foundries, and packaging and testing companies in mainland China and Taiwan as key potential customers. High-resolution flat-panel displays (LCD/OLED) are becoming increasingly integrated. Current display driver ICs (DDIs) typically contain a large amount of logic/analog circuitry, such as those used to manage touch functions. Furthermore, the rapid growth in the use of LCD/OLED in mobile electronics is driving demand for smaller and more powerful DDIs. These factors pose significant challenges for chip testing. Display Driver IC Tester are designed to meet the demands of the ever-increasing pin count and interface speed of DDIs.Growing global demand for consumer electronics devices and the rise of the Internet of Things (IoT) are driving sustained growth in the panel industry and the DDI chip market. With increasing demand for diversified display panels with ultra-high definition, high smoothness, and high color saturation, LCD driver chips, as one of the key control components of display panels, are also developing towards ultra-high integration and stability. The increasing integration of high-resolution display driver ICs has correspondingly increased the challenges faced in testing these ICs. China has become the world's largest flat panel display manufacturer by shipment volume. The gradual evolution of display technology from LCD to OLED, and from 2K, 4K, to 8K, has driven significant demand for LCD/OLED driver chip testers in mainland China.
