Report Overview

Disposable bouffant caps are also known as nurse caps or surgical caps. They are comfortable to wear, lightweight, cost-effective, easy to use, and provide effective protection against infection and product contamination. A bouffant cap is a disposable cap manufactured from non-woven 100% polypropylene material with soft thread elastic bands to keep the cap fit, comfortable and adjustable.

They have medical-grade finish quality, consisting of features like sweat absorption and shrink-resistance. One layer bouffant caps are comfortable for long durations, providing good ventilation to the head. The bouffant caps with three layers are made of heavyweight spun bound polypropylene or SMS (Spunbond/Meltblown/Spunbond) fabrics to provide additional strength, comfort, and ventilation.

The disposable bouffant caps are extremely helpful in the food industry to avoid food contamination due to hair fall during cooking and serving the food. In addition, disposable bouffant caps are beneficial in hospitals, clinics and diagnostic centres for doctors, and nurses during surgery and health checkup to protect the patient from any bacteria or viral infections. To avoid any surgical site infections during the surgeries, the Association of periOperative Registered Nurses (AORN) has recommended that all medical members should compulsorily wear bouffant caps during surgeries. The rising awareness of health and hygiene and the booming healthcare and personal care sector for disposable products is expected to propel the growth of the disposable bouffant caps market.
