Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Disposable Endoscopic Mouthpiece competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of disposable endoscopic mouthpieces reached 185 million units, with an average selling price of US\$0.65 per unit. Disposable endoscopic mouthpieces are disposable medical consumables used during upper gastrointestinal endoscopy to prevent patients from biting off the endoscopic probe and to secure the opening. They are characterized by avoiding cross-infection, ease of use, and controllable cost. Upstream raw materials include medical-grade PP, PE, or EVA polymer materials and a small amount of TPE elastic rings. Major suppliers include Sabic, LyondellBasell, Sinopec, and DuPont. Downstream end-users are hospital gastrointestinal endoscopy centers, outpatient endoscopy rooms, and surgical centers. Global total production capacity is approximately 240-310 million units per year, with an average industry gross profit margin of approximately 28%-42%. Downstream consumption is comprised of approximately 65% in tertiary hospitals and large medical centers, approximately 25% in private and health checkup institutions, and approximately 10% in primary healthcare systems. Upstream raw material costs are comprised of 42% for PP/PE materials, 33% for molding and processing and mold depreciation, and 25% for sterilization and packaging. Future demand and business opportunities will mainly come from the continued growth in global endoscopic examinations, the increasing trend of disposable consumables replacing reusable instruments, and the rapid expansion of the market driven by the tightening of medical disinfection regulations in emerging countries.

The global Disposable Endoscopic Mouthpiece market size was estimated at USD

120.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.90% during the forecast period.
