Report Overview:

On the basis of type, the diving equipment market has been segmented into rebreather, cylinder and propulsion vehicle, decompression chamber, exposure suit, and accessories. The rebreather segment is estimated to lead the diving equipment market in 2016. This growth can be attributed to the usage of this equipment in two major application areas, namely, commercial and defense; and the fact that it can provide air under high pressure underwater. The exposure suit segment is expected to lead the diving equipment market during the forecast period, owing to need of changing these suits frequently as these suits have short life cycle. Moreover, damages caused by harsh environments underwater also result in frequent replacement of these suits.

The Global Diving Equipment Market Size was estimated at USD 2604.08 million in 2023 and is projected to reach USD 2984.75 million by 2029, exhibiting a CAGR of 2.30% during the forecast period.
