Abstracts

A doctor blade is the thin sheet on a printing machine that is used to remove excess ink from the surface of the roller. During each printing process, removing the ink of patternless area is the key point. In offset printing, this control is a complex process of ink transfer, including ink, formes and paper. In intaglio printing, it is a mechanical operation, which is relatively simple but unique. Doctor blades are required to have abrasive resistance and high efficiency, which ensure the high quality of printing, and they must fit modern intaglio printing's need of resistance and high speed. Among applications of doctor blades, intaglio printing is the largest segment which occupied over 60% of the Chinese market in 2019, followed by flexographic printing and offset printing with totally over 30%. Key players of Chinese doctor blade market are Daetwyler, Kadant, Shengdeli, TKM, SICROMAN, Swedev, Esterlam, Fuji Shoko, Ma'anshan Ruideli, etc. The top 5 companies of Chinese market accounted for almost 65% of market share.
