Abstracts

Dodecagon socket bolts, also known as 12-point socket bolts or triple-square bolts, are specialized fasteners featuring a unique 12-point recess in the bolt head designed to distribute torque more evenly and resist cam-out compared to standard hex or square drives. These bolts are engineered for high-torque applications, particularly in precision industries such as automotive manufacturing, aerospace, heavy machinery, and industrial equipment, where reliable fastening under stress is critical. Their design allows for a more compact head profile, making them suitable for confined spaces while maintaining superior grip and reducing the risk of tool slippage or damage to the fastener during installation or removal.

The global Dodecagon Socket Bolts market size was estimated at USD 440.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 3.50% during the forecast period.
