Report Overview

Door exit hardware refers to a range of devices and systems designed to ensure safe and efficient egress from buildings while maintaining security and compliance with fire and building codes. This includes panic bars, push pads, touchless exit devices, locksets, and electromagnetic door holders, which are commonly used in commercial, industrial, and institutional settings. The hardware must meet stringent safety standards, such as those set by NFPA 101 and ADA, to facilitate quick evacuation during emergencies while preventing unauthorized access. The market is driven by increasing construction activities, stringent regulatory requirements, and growing demand for energy-efficient and touchless solutions post-pandemic. Key players include Allegion, ASSA ABLOY, and dormakaba, with innovations focusing on smart access control integration and durability enhancements. Regional demand varies, with North America and Europe leading due to strict safety regulations, while Asia-Pacific shows rapid growth due to urbanization and infrastructure development. Challenges include high installation costs and the need for regular maintenance, but advancements in wireless and IoT-enabled exit hardware present significant opportunities for market expansion.
