## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Dopamine Receptor Mediators competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Dopamine Receptor Mediators are a type of G protein-coupled receptors (GPCRs) located on the cell membrane and are key molecular targets for dopamine (an important neurotransmitter) to exert its physiological functions. They are divided into two families, D1-like (D1, D5) and D2-like (D2, D3, D4), which are widely distributed in the central nervous system and participate in regulating movement, emotions, reward mechanisms, endocrine, learning and memory and other functions. Abnormal activity of dopamine receptors is closely related to a variety of neuropsychiatric diseases such as Parkinson's disease, schizophrenia, depression and addiction. The sales volume in 2024 will be 256K units, with an average price of approximately US\$300.

The global Dopamine Receptor Mediators market size was estimated at USD 77.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 10.00% during the forecast period.
