Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Double Eccentric Soft Seal Butterfly Valve competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of double-eccentric soft-seal butterfly valves reached 9.7 million units, with an average selling price of US\$138 per unit. Double-eccentric soft-seal butterfly valves are rotary valves with a double-offset disc axis relative to the seat axis. This eccentric design reduces friction and improves seal life. They are widely used in low-pressure systems such as water supply and drainage, HVAC, petrochemicals, power generation, and food and pharmaceutical pipelines. The main upstream raw materials include ductile iron, stainless steel valve bodies, EPDM or NBR rubber seals, valve stem steel, and coating materials. Major suppliers include Baosteel, Tsingshan Holdings, 3M, Wacker, and Lanxess. Global production capacity is approximately 12.5 million units, with an average gross profit margin of approximately 27%. Downstream consumption is concentrated in municipal and water engineering, accounting for approximately 45%, HVAC and building systems for 30%, chemical and energy for 20%, and other industrial applications for approximately 5%. Upstream material consumption is approximately 60% metal body material, 25% sealing rubber material, 10% valve stem and fasteners, and 5% coating and auxiliary materials. Future development directions include intelligent control butterfly valves, replaceable sealing structures and lightweight composite valve bodies to improve automation adaptability and corrosion resistance, in line with the development trend of green fluid transportation systems.

The global Double Eccentric Soft Seal Butterfly Valve market size was estimated at USD 1339.0 million in 2025 and is projected to grow at a compound annual growth rate

(CAGR) of 4.90% during the forecast period.
