The Dual-Drum Dryer is a highly efficient drying device with a dual-drum design, commonly used in industrial and commercial areas, such as laundries, hotels and other places. The device evenly distributes and heats the clothes to dry through the simultaneous rotation of two drums, with high drying efficiency and better clothing protection. Compared with single-drum devices, the Dual-Drum Dryer can provide stronger airflow and a faster drying process. At the same time, through the coordinated work of the dual drums, it reduces clothing entanglement and damage, and is suitable for processing large quantities of clothing, especially for large capacity and high-frequency use.
