## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Dried Mango competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Dried mango is processed from fresh mango. Dried mango is beneficial to stomach, vomiting and anti-halation. Therefore, mango is effective for vertigo, Meniere's syndrome, high blood dizziness, nausea and vomiting. The edible part of mango contains 0.6% crude protein, 13% total sugar, 0.3% total acid, 0.4% mineral, and contains 180 mg of potassium, 15 mg of calcium, 18 mg of magnesium, and phosphorus per 100 g of fresh pulp. 15 mg, VC25-50 mg,  $\beta$ -carotene 500?5 000?g, thiamine 50?g, riboflavin 60?g, niacin 800?g, in addition, mango contains 30?126mg free amino acids (including 8 essential amino acids) ), the content of  $\beta$ -carotene is high, ranking first among tropical fruits. As a food with distinctive characteristics and taste, dried mango has attracted more and more consumers. This dried fruit is naturally sweet and delicious. It not only provides endless flavor when eaten directly, but also has a unique flavor in cooking and baking. In addition, dried mango is also rich in vitamins, fiber and other beneficial substances, and is regarded by consumers as a healthy snack choice. All these factors have jointly promoted the expansion of the dried mango market. As a convenient and portable snack, dried mango is very popular in modern fast-paced life. In addition, with the rapid development of the Internet and e-commerce, the rise of online sales channels has made the sales of dried mango more convenient and extensive. Under the joint influence of these factors, the scale of the dried mango market continues to expand and shows a good development trend. Not only major domestic food companies have set foot in the field of dried mangoes, but many small agricultural product processing companies have also seen the profit potential of the market and further expanded the production of dried mangoes. At the same time, because its production process is

relatively simple, some consumers have also begun to try to make dried mangoes at home, which further challenges brand manufacturers in the market. The number of exported dried mangoes is also increasing in major mango producing countries such as Thailand, India, the Philippines and China. At the same time, with the popularity of e-commerce and cross-border trade, the international sales network of dried mangoes has become more smooth. This provides further development space for the market size of dried mangoes. The market demand for dried mangoes has grown steadily. Consumers pay more and more attention to healthy nutrition and natural food, and the pure natural and additive-free characteristics of dried mangoes have been widely recognized. In addition, the diversified applications of dried mangoes have also increased its market demand, such as in ice cream, beverages, bread and other fields.

The global Dried Mango market size was estimated at USD 1275.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.30% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Dried Mango market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.

A significant focus of this report lies in the competitive landscape of the global Dried Mango market. It offers detailed profiles of major players, including their market shares, performance metrics, product portfolios, and operational status. This enables stakeholders to identify leading competitors and gain a nuanced understanding of market rivalry and structure.

In summary, this report serves as an essential resource for industry participants, investors, researchers, consultants, and business strategists, as well as anyone planning to enter or expand their presence in the Dried Mango market.

## **Global Dried Mango Market: Market Segmentation Analysis**

This research report provides a detailed segmentation of the market by region (country), key manufacturers, product type, and application. Market segmentation divides the overall market into distinct subsets based on factors such as product categories, end-user industries, geographic locations, and other relevant criteria.

A clear understanding of these market segments enables decision-makers to tailor their product development, sales, and marketing strategies more effectively to meet the unique needs of each segment. Leveraging market segmentation insights can significantly enhance targeted approaches, optimize resource allocation, and accelerate product innovation cycles by aligning offerings with the specific demands of diverse customer groups.
