### Report Overview

An unmanned aerial vehicle (UAV) (commonly known as a drone) is an aircraft without a human pilot on board. UAVs are a component of an unmanned aircraft system (UAS), which include a UAV, a ground-based controller, and a system of communications between the two. The flight of UAVs may operate with various degrees of autonomy: either under remote control by a human operator or autonomously by onboard computers referred to as an autopilot.

Compared to crewed aircraft, UAVs were originally used for missions too 'dull, dirty or dangerous' for humans. While drones originated mostly in military applications, their use is rapidly finding many more applications including aerial photography, product deliveries, agriculture, policing and surveillance, infrastructure inspections, science, smuggling, and drone racing.

The drone market is concentrated but with fierce competition. DJI is the leading player in the Indonesia & Vietnam Drone market with a market share over 45%, followed by Famindo Group, TOP Engineering, JWC Lab – Xelex, Eagle Brother, XAG, Viettel, 3D Robotics, CASC, Beihang UAS Technology.

In terms of product, Small Drone is the largest segment, with a share over 60%. And in terms of application, the largest application in Agriculture, followed by Entertainment & Media & Mapping, etc.
