Report Overview

Drug excipients are inactive substances used as carriers, stabilizers, or fillers in pharmaceutical formulations, playing a critical role in drug delivery, bioavailability, and stability without exerting therapeutic effects. They include binders, diluents, lubricants, coatings, preservatives, and flavoring agents, each serving specific functional purposes to enhance drug efficacy, patient compliance, and manufacturing efficiency. The market for drug excipients is driven by the growing pharmaceutical industry, increasing demand for novel drug delivery systems, and advancements in biopharmaceuticals, with a focus on biocompatible and multifunctional excipients.
