Abstracts

Dry-type premold termination is a termination solution for power cable systems, especially for medium and high voltage cable systems. Unlike conventional wet or cast-in-place terminals, dry precast terminals are pre-fabricated components that do not require the use of insulating oil or other liquid media to fill during installation, hence the term "dry." This type of termination design simplifies the installation process and increases the reliability and safety of the cable system.

The global Dry-type Premold Termination market size was estimated at USD 563.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.50% during the forecast period.
