Abstracts

Dump body liners are protective sheets or panels made from durable materials, such as ultra-high molecular weight (UHMW) polyethylene, steel, or rubber, designed to line the interior of dump truck or hopper bodies. These liners serve to reduce wear and tear caused by abrasive materials like sand, gravel, coal, or ore and enhance the flow of sticky or bulk materials during unloading, preventing sticking or clogging. By minimizing material adhesion and impact damage, dump body liners increase the lifespan of the equipment, improve operational efficiency, and lower maintenance costs.

The global Dump Body Liners market size was estimated at USD 359.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.20% during the forecast period.
