Abstracts

Durable label facestock is a film facestock used for durable labels. Durable labels must endure heat, chemicals, solvents, water, mechanical strain and challenging outdoor conditions. Facestock is the material that holds ink on one side and adhesive on the other, making it the core of any label construction. Just as there are a variety of label adhesives, facestocks come in a range of materials. Durable label facestock uses heavy-duty materials like polypropylene, polyethylene, or polyester. While paper can be water resistant with the right combination of adhesives and coatings, the most durable labeling products use plastic face stock. Polyester labels and vinyl labels are popular heavy-duty choices.
