Abstracts

Dust explosion-proof permanent magnet motor is a motor designed for flammable and explosive dust environments. It uses permanent magnet materials (such as NdFeB) as the magnetic field source and has high energy efficiency and reliability. The motor is treated with explosion-proof technology to prevent sparks, overheating or other dangers that may cause explosions during operation, ensuring the safe operation of the equipment in environments containing combustible dust such as coal mines, chemical plants, metallurgical plants, and grain processing. Dust explosion-proof permanent magnet motors usually comply with international explosion-proof standards (such as ATEX, IECEx, UL, etc.) and are widely used in drive systems in high-risk industries to ensure the safety and stability of the production process.

The global Dust Explosion-Proof Permanent Magnet Motor market size was estimated at USD 1408.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.90% during the forecast period.
