Abstracts

A dyebath softener is a specialized chemical additive used in the dyeing process that, without compromising the dyeing effect, significantly enhances the softness and comfort of textiles, endowing them with a fine and smooth touch. By reducing the friction and entanglement between fibers, it imparts a lasting softening effect on the fabric while preserving its natural skin-friendly properties, thereby enhancing the wearing experience. Additionally, this additive exhibits wash resistance, maintaining the softness even after multiple washes, which improves the durability and customer satisfaction of the product. Its eco-friendly formulation reduces the environmental impact, reflecting the emphasis on sustainable development in modern industrial production.

The global Dyebath Softener market size was estimated at USD 542.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.60% during the forecast period.
