Report Overview:

A bicycle-sharing system, public bicycle system, or bike-share scheme, is a service in which bicycles are made available for shared use to individuals on a short term basis for a price or free. Many bike share systems allow people to borrow a bike from a "dock" and return it at another dock belonging to the same system. Docks are special bike racks that lock the bike, and only release it by computer control. The user enters payment information, and the computer unlocks a bike. The user returns the bike by placing it in the dock, which locks it in place. Other systems are dockless. For many systems, smartphone mapping apps show nearby available bikes and open docks.

The Global E-bike Sharing Service Market Size was estimated at USD 1346.20 million in 2023 and is projected to reach USD 1645.25 million by 2029, exhibiting a CAGR of 3.40% during the forecast period.
