### Report Overview

The E-Bus Pantograph Charging System is a technology used for electric buses, where a pantograph (an extendable arm) is mounted on the bus's roof, and a charging infrastructure, typically located at bus stops or depots, features a complementary pantograph. This system enables fast and automated charging of electric buses during scheduled stops or layovers. When a bus aligns with the charging station, the pantograph on the bus rises to connect with the infrastructure, allowing for efficient and high-capacity charging. E-Bus Pantograph Charging Systems are designed to enhance the operational flexibility and range of electric buses, making them suitable for urban public transportation while minimizing downtime for charging.
